ARCHITECTURAL APPROVAL CHECKLIST

When you are ready to begin the building process **and prior to applying for a building permit**, you will need to submit your construction plans to the Architectural Control Committee (ACC) at the address listed above for approval. The approval process will take approximately 1 week. Below is a checklist to help you expedite your approval process.

- Submit a minimum of 2 copies of a survey prepared by a licensed surveyor or plot layout.**
 Survey must show the house placement, driveway location and proposed yard grade.
- Submit a minimum of 2 copies of the home construction plans.**
 (Note: 1 copy will remain on file with the ACC and the balance will be returned to you.)
Each plan must meet the following minimum guidelines:
 - Minimum square footage (Ranch: 1,300 sq.ft.; 2-story: 1,600 sq.ft. with 900 sq.ft. on 1st floor)
 (Note: Finished basements do not count toward the minimum square footage. Total square footage must be listed on the plan.)
 - Minimum 30% of the front of the home must be faced with brick or stone, or cultured brick or stone. (Note: Salt box style homes are exempt from the brick and stone requirement.)
 - Minimum 2 car attached garage (400 sq.ft.) / Maximum 3 car attached garage
 - Minimum roof pitch of 6:12
 - 30 year dimensional shingle in the color weatherwood.
 - The type of exterior materials must be listed on the plan for items such as siding, soffit and fascia, trim.
 - On lots that require basement exposures, the house plan must show exposed areas and the siding treatment and windows.
- Submit exterior colors and samples. (Optional)**
 - Roofing color must be weatherwood.
- Submit cover letter with who to contact if there are questions on the plan and if you will be picking up the plans or if they are to be mailed. Please provide name, phone number and mailing address.**

The Architectural Control Committee has the right to request and require plan changes, additions and/or deletions of architectural details to your plan. The above listed items are a minimum guideline as outlined in the Declaration of Covenants, Conditions and Restrictions. The ACC review process is subjective and will consider the minimum requirements along with overall curb appeal for the best fit of the proposed home into the subdivision. After the ACC has reviewed your plan it will be returned as either "Approved as Submitted", "Approved as Corrected" or "Not Approved". In the case of "Not Approved" the plan must be resubmitted for approval.

Accessory Buildings (Storage Sheds)

- Submit a minimum of 2 copies of plan
 - Minimum 100 sq.ft. / Maximum 150 sq.ft. of floor area.
 - Exterior materials and colors must match home
 - Minimum set backs per the City ordinance.
- Submit a minimum of 2 copies of a survey or plot layout showing the location of the proposed building.
- Submit cover letter with who to contact if there are questions on the plan and if you will be picking up the plans or if they are to be mailed. Please provide name, phone number and mailing address.

Fences

- Submit a minimum of 2 copies of a survey or plot layout showing the location of the proposed fencing.
 - No fences are allowed in the front yard.
- Submit a minimum of 2 photos/samples of materials that will be used
 - Maximum height 4 feet.
 - Constructed of wood (no metal fences allowed).
- Submit cover letter with who to contact if there are questions on the plan and if you will be picking up the plans or if they are to be mailed. Please provide name, phone number and mailing address.

Submittals for Accessory Buildings (Sheds) and Fences must be done prior to applying for a building permit.

As construction nears completion, please remember to do following:

- Lot must be landscaped with a least 1 shade tree with a minimum 1.5 inch diameter (trunk size) and the lot must be seeded or sodded within 1 year after home is complete. During the time the lot is not landscaped the homeowner is responsible to maintain erosion control measures to prevent dirt, mud and silt from washing and eroding onto streets, sidewalks and neighboring properties.
- Hard surfaced driveway must be installed within 1 year after home is complete. **Note: Be sure to check with the building inspector to see if a driveway permit is required.**
